Tutto iniziò nel 1899...
Everything started in 1899.....

Senza rinunciare alla propria vocazione classica, Banci crea negli anni una linea di prodotti più liberi dalle cristalline ma talvolta severe esigenze della tradizione.

Sono oggetti nei quali lo stile Banci si esprime e rimane inconfondibile: attraverso un controllato intervento di design, nell'abbinamento di materiali diversi, di colori alternativi, nascono variazioni che, con disinvoltura e personalità, si inseriscono in ambienti diversificati e moderni.

La rivisitazione di un dettaglio può trasformare profondamente l'aspetto di un oggetto e l'atmosfera che esso contribuisce a creare. Ammorbidire la curvatura del braccio di un lampadario; intervenire sulle decorazioni con il tocco di un colore intenso ed inaspettato; oppure valorizzare l'unicità di materiali preziosi come il cristallo di rocca: sono sufficienti interventi simili a questi per trasformare in modo sensibile il carattere e la percezione dell'oggetto.

Restando nel solco della lavorazione tradizionale, la progettazione si apre così ad un'innovazione meditata, disponibile alle sfumature ed ai contrasti di colore, ed a provocazioni stilistiche mai fini a se stesse, sempre concepite per la concretezza di uno spazio da arredare con misura ed invenzione.

"Metamorfosi è l'oltrepassamento di una forma data". Banci si muove qui sul filo sottile di chi trasforma senza smarrire la propria natura, la propria identità.

During the course of the years Banci has come up with a line of creations slightly relieved from the sometimes rigid impositions of tradition yet without losing its classical purpose.

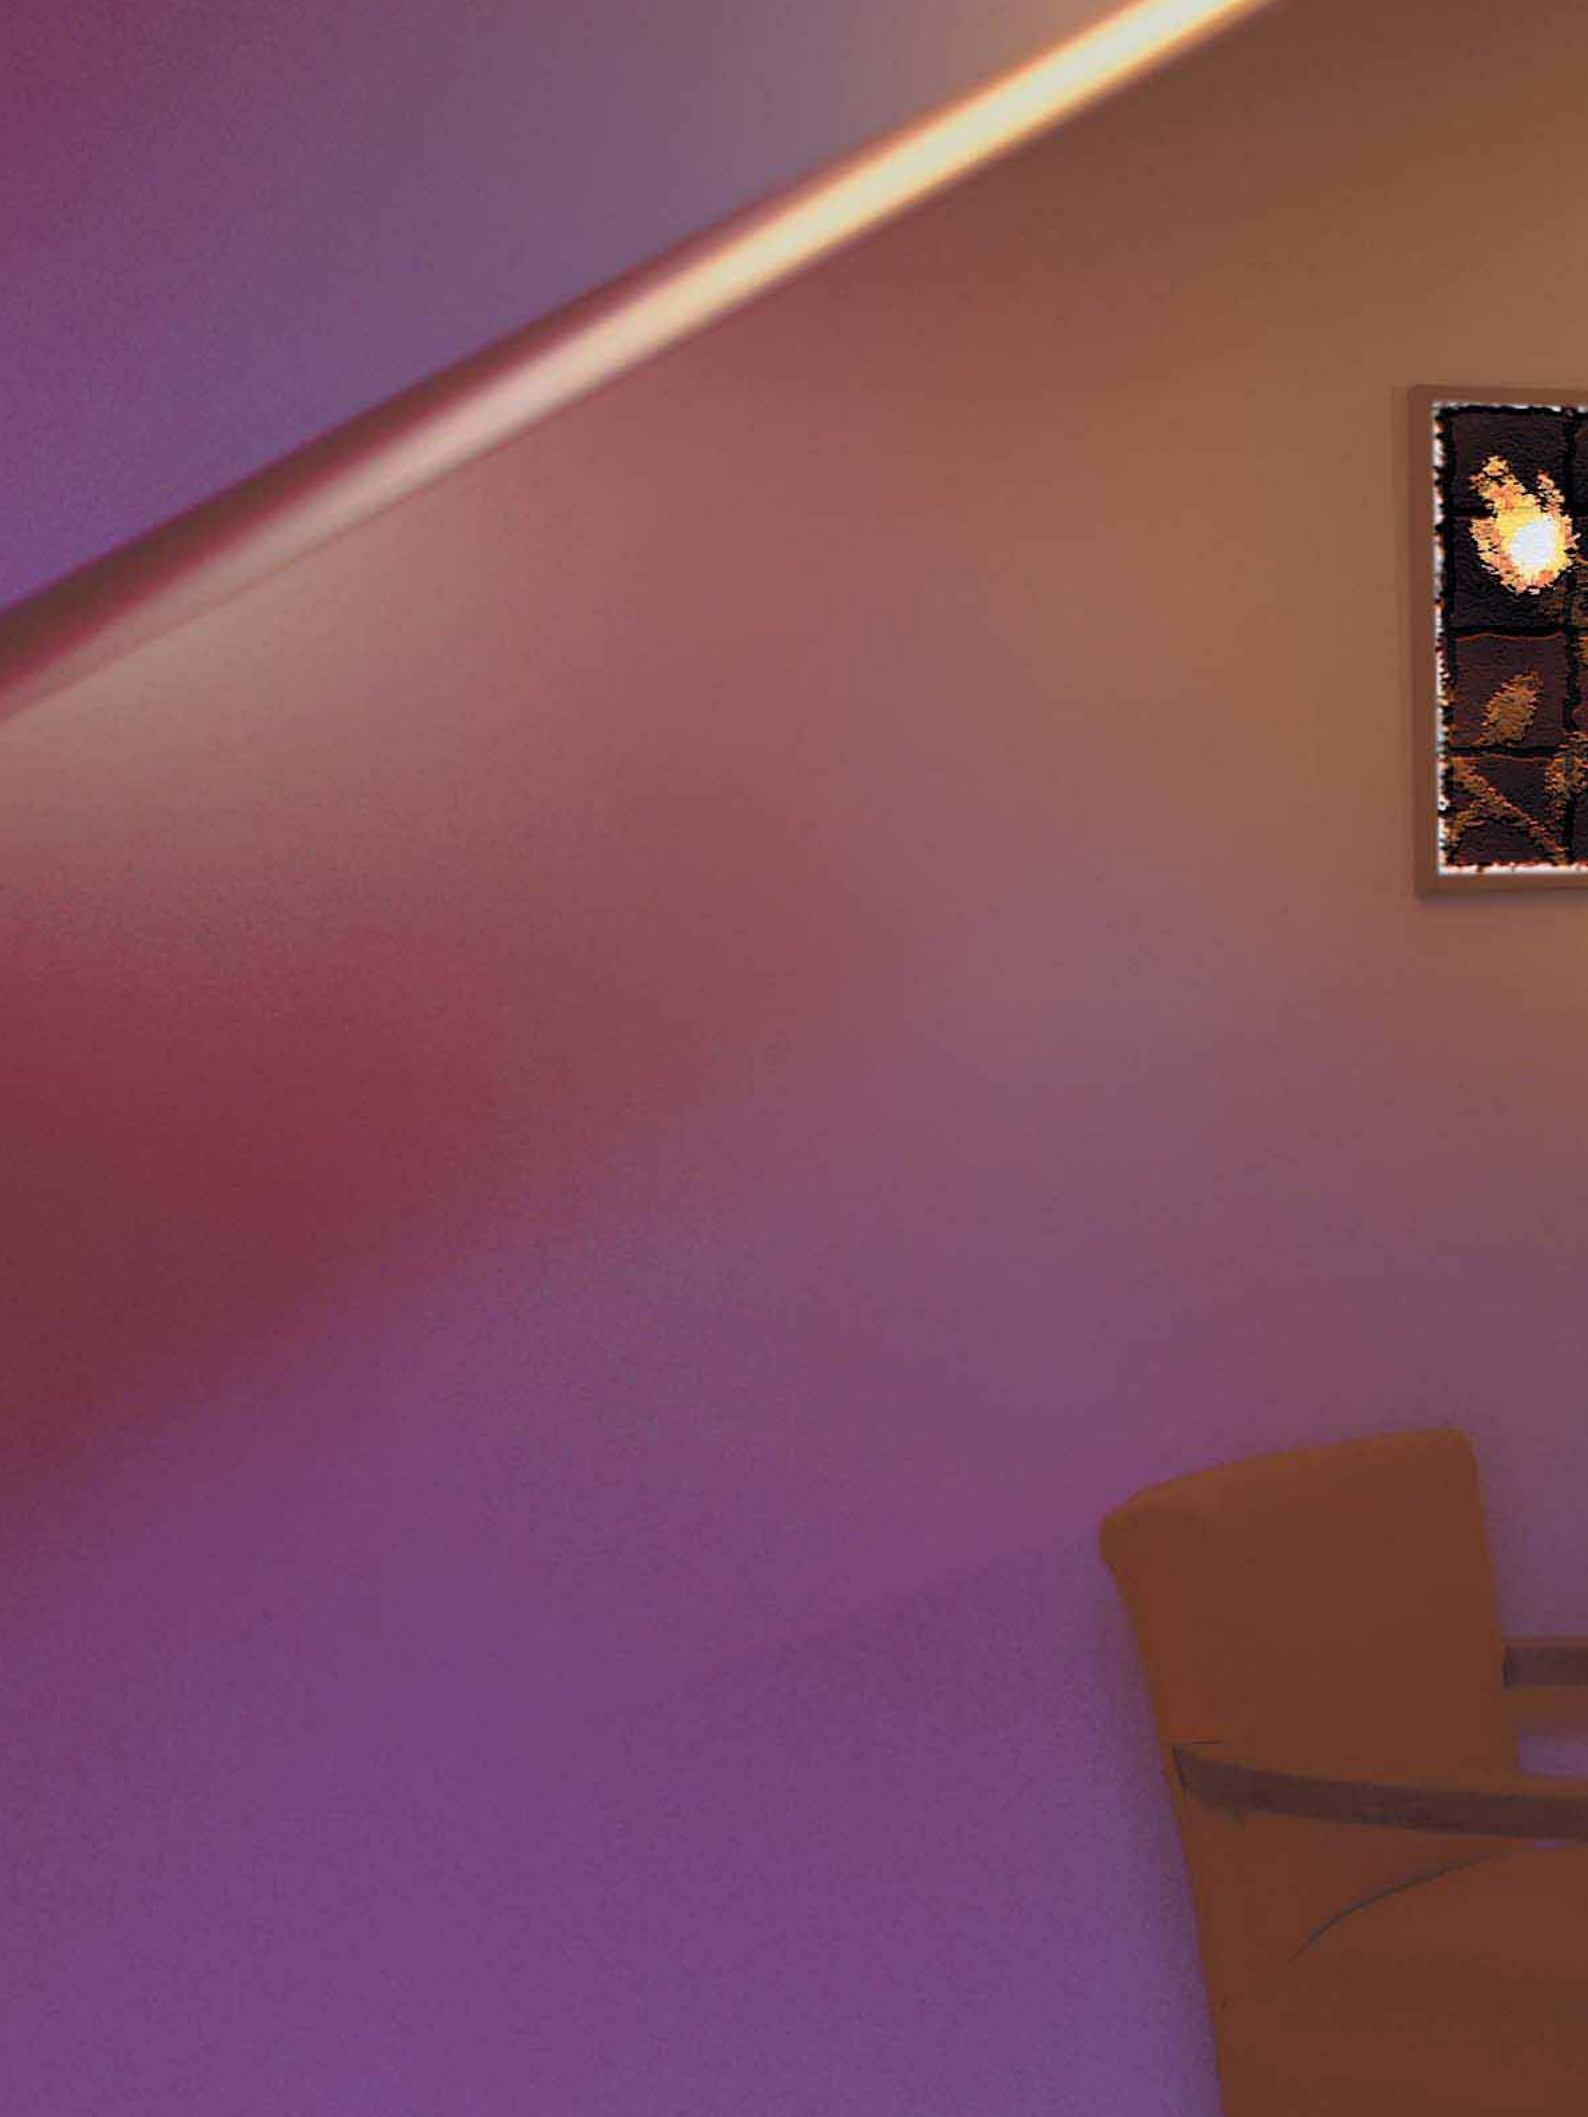

Banci style is still unmistakable: these objects are born thanks to a careful design by matching different colours and materials in order to obtain an original product which can be easily fit inside different and modern spaces. The reassessment of a single detail can deeply reshape the nature of an object and change the atmosphere it creates around it.

A few light changes as softening the bending of a chandelier branch; colouring a pendant with unusual and vigorous shades; or stressing the uniqueness of a material like Rock crystal: all this can utterly transform the character of an object and its perception in space.

Though still hanging on to traditional workmanship, the design opens up to an attentive metamorphosis with colour nuances as well as contrasts, stylistic challenges which are never for their own sake but in fact conceived in order to furnish any space with creativity and yet assessment.

"A metamorphosis is to go beyond a given form".

Here Banci is on a creative threshold: it transforms without losing its own nature and identity.
